

Professional Railway Infrastructure

Executive Program

COURSES OFFERED

Railway Infrastructure - Part 1
(Depot, Stations)

Railway Infrastructure - Part 2
(Bridge, Tunnel)

Railway Infrastructure - Part 3
(Trackwork Engineering)

Railway Facilities in Building
Construction - MEP
(Mechanical, Electrical & Plumbing)

Synopsis

This programme provides a comprehensive understanding of the key components that form the backbone of modern railway infrastructure.

Participants will explore the design and construction of depots, stations, bridges, tunnels, and trackwork systems, along with MEP facilities in railway buildings. The programme emphasizes engineering integration, safety, and sustainability – preparing professionals to manage and deliver high-quality railway infrastructure projects.

INTAKE : FEBRUARY & SEPTEMBER

TOTAL CONTACT HOURS : 80
