

Professional Railway Economics and Revenue Management

Executive Program

COURSES OFFERED

Transportation Economics Principle

Transit-Oriented Development

Railway Assets, Facility & Maintenance Management

Land and Property Revenue

Station Management & Advertisement Revenue

Social Impact Assessment & Environmental Planning

Synopsis

This programme explores the economic, managerial, and operational aspects that drive modern railway systems and sustainable transport growth.

Participants will learn how railway projects generate value through planning, asset management, and revenue strategies such as land development and advertising. The programme also covers social and environmental considerations, equipping professionals to manage railway operations with both financial insight and community impact in mind.

INTAKE : FEBRUARY & SEPTEMBER
